AWS learning paths

Role-based Paths

Cloud Practitioner

This path is intended for individuals who want to learn AWS Cloud fundamentals and best practices.

Architect

This path is intended for solutions architects, solution design engineers, and anyone who wants to learn how to design applications and systems on AWS.

Developer

This path is intended for software developers who want to learn how to develop cloud applications on AWS.

Operations

This path is intended for SysOps administrators, systems administrators, and those in DevOps roles.

Specialty Paths

Big Data

This path is intended for anyone who wants to learn to design and implement AWS services to derive value from data.

Security

This path is intended for anyone who wants to learn processes and best practices for securing the AWS platform.

Advanced Networking

This path is intended for anyone who wants to design and implement AWS and hybrid IT architectures at scale.

AWS Solutions Paths

Machine Learning

This path is intended for learners to dive deep into the same machine learning (ML) curriculum used to train Amazon's developers and data scientists.

AWS Media Services

This path is intended for anyone who wants to learn how AWS Media Services can create professional-quality media experiences without the time, effort, or expense that are typically required to run specialized video equipment.

Storage

This path is intended for enterprise storage engineers to learn how to architect and manage highly available solutions, with a focus on AWS storage services.

MACHINE LEARNING			
Title	Description	Duration	Course level
RobotProject: Build a Robot with AWS AI Services	Do you want to build a robot? We will show you how to build one that moves, identifies objects, and gives commands based on what it sees and who you can control it with your voice. In this course, we will walk you through building a robot using a Raspberry Pi with AWS machine learning services like Amazon Rekognition, Amazon Lex, Amazon Polly, and AWS Lambda functions. You will learn how to control it with either voice and text or a web interface.	20 minutes	Intermediate
Satellite Image Classification in SageMaker	This course begins with a thorough walk-through of the machine learning process and a discussion of how to frame the business problem for satellite image recognition. You will learn about current approaches and how to use them to solve the problem. The second part of the course covers the creation of the appropriate training data. The second part of the course deals with the technical aspects of satellite image recognition, specifically data acquisition and feature recognition.	20 Minutes	Intermediate
Types of Machine Learning Solutions	As you dive deeper into studying machine learning, the area of focus split into three different disciplines: computer vision, natural language processing, and chatbots. Blaine Sundstrom of AWS Training and Certification walks you through what each discipline covers in terms of practical applications and lays out the AWS services used in each track, so you can choose the learning path that best fits your needs.	15 minutes	Intermediate
Understanding Neural Networks	The backbone of machine learning is the neural network. In this course, you will learn about single-layer neural networks, convolutional neural networks, and recurrent neural networks.	10 minutes	Intermediate
Advanced Analytics with Amazon SageMaker	This course is presented in two parts and provides an in-depth exploration of Amazon SageMaker. Its features, and its benefits when used in conjunction with Apache Spark.	25 minutes	Advanced
Amazon Transcribe Deep Dive: Using Feedback Loops to Improve Confidence Level of Transcriptions	This demonstration shows you how to use a feedback loop to process custom vocabulary to improve transcription generated by the Amazon Transcribe service. We will also review some use cases so you can see how it works in the real world.	40 minutes	Advanced
Anomaly Detection on AWS	Explore some of the more practical aspects of building anomaly detection applications on AWS, using Amazon Kinesis Data Analytics and Amazon SageMaker.	25 minutes	Advanced

ARCHITECTING			
Title	Description	Duration	Course level
AWS Business Essentials	In this course, you will learn the benefits of cloud computing and how a cloud strategy can help you meet your business objectives. This course explores the advantages of cloud computing for your business and the fundamentals of AWS, including financial benefits. It also introduces compliance and security concepts to help you consider the AWS platform within your cloud computing strategy.	1 day	Foundational
AWS Technical Essentials	AWS Technical Essentials introduces you to AWS products, services, and common solutions. It provides you with the fundamentals to become more proficient in identifying AWS services so that you can make informed decisions about IT solutions based on your business requirements and get started working on AWS.	1 day	Foundational
Secrets to Successful Cloud Transformations	In this course, you will learn how to select the right strategy, people, migration plan, and financial management methodology to move your workloads to the AWS Cloud. You will learn how to build a holistic cloud adoption plan and how to hire people to execute that plan, and gain best practices for choosing workloads to migrate from your on-premises environment to AWS.	1 day	Foundational
Architecting on AWS	This course shows you the fundamentals of building IT infrastructure on the AWS platform. You will learn how to optimize the AWS Cloud by understanding AWS services and how they fit into cloud-based solutions, explore best practices and design patterns to help you architect optimal IT solutions on AWS, and then build and explore a variety of infrastructures through guided, hands-on activity.	3 days	Intermediate
Advanced Architecting on AWS	Building on concepts introduced in Architecting on AWS, this course covers how to build complex solutions that incorporate data services, governance, and security on AWS.	3 days	Advanced

AWS certification

Available AWS certifications

aws certified

Updated May 2019

Professional

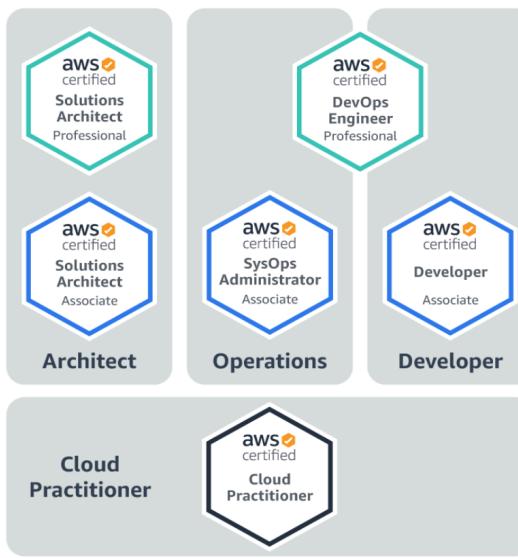

Two years of comprehensive experience designing, operating, and troubleshooting solutions using the AWS Cloud

Associate

One year of experience solving problems and implementing solutions using the AWS Cloud

Foundational

Six months of fundamental AWS Cloud and industry knowledge

Specialty

Technical AWS Cloud experience in the Specialty domain as specified in the **exam guide**

© 2020, Amazon Web Services, Inc. or its affiliates. All rights reserved.

How to prepare for AWS certification

STEP 1

Take an AWS Classroom or Digital Training course

Training can help you advance your technical skills and learn best practices for working with AWS.

STEP 2

Review the exam guide and sample questions

See the concepts covered in the exam to get a blueprint of what you need to study. You'll also find recommended AWS Training, AWS whitepapers, and FAQ.

Don't skip the sample questions, which can help you check your knowledge and pinpoint concepts and areas requiring more study.

STEP 3

Study AWS whitepapers and FAQs

Broaden your technical understanding with whitepapers and FAQs written by the AWS team, independent analysts, and AWS partners.

STEP 5

Take a practice exam

Test your knowledge online in a timed environment. Register at [aws.training](#).

...

STEP 4

Take Exam Readiness Training

Prepare for your AWS Certification exam with Exam Readiness Training by AWS. We'll teach you how to interpret exam questions and allocate your study time. Explore [Exam Readiness courses](#).

STEP 6

Schedule your exam and get AWS Certified

Schedule your exam at a testing center near you at [aws.training](#).
